ORIENT - 00000 000 00000000 by 00's shop000000000000

2020/08/25

ORIENT(orientation) returns the orientation of the object. The orientation is a value from 0 to 359, representing the angle in degrees from the positive x-axis to the positive y-axis. The orientation is 0 if the object is horizontal, 90 if the object is vertical, 180 if the object is horizontal and inverted, and 270 if the object is vertical and inverted.

A visual representation of the number 344 using base ten blocks. It consists of three tens rods (each labeled '10'), four tens rods (each labeled '10'), and four ones units (each labeled '1'). The three tens rods are grouped together on the left, and the four tens rods and four ones units are grouped together on the right.
